HARDY MAROOF
Kansas City, MO | 720-582-5717 | hardybahroz9@gmail.com
Citizenship: United States Citizen | LinkedIn: www.linkedin.com/in/hardy-maroof-359a30177

PROFESSIONAL SUMMARY

Results-driven **Data Center Commissioning & Operations Specialist** combining a **B.S. in Mechanical Engineering** with an **M.S. in Cybersecurity Operations** and an active **CompTIA Security+** certification. Proven track record optimizing, testing, and securing critical mission-critical facility infrastructure across electrical, BMS, and mechanical cooling plants. Expert in translating complex sequence of operations (SOO) into field-level execution scripts, managing vendor testing protocols, and ensuring 100% facility uptime under strict safety boundaries.

TECHNICAL SKILLS & INFRASTRUCTURE EXPERTISE

- **Commissioning & Operations:** Level 4 Functional Performance Testing (FPT), Level 5 Integrated Systems Testing (IST), Method of Procedure (MOP) development, SOP execution, LOTO protocols, CxAlloy tracking.
- **Critical Facilities Infrastructure:** Centrifugal Chiller Plants, Air Handling Units (AHUs), Chilled Water Loop Balancing, Pumping Packages, Automated Control Valves, Industrial Cooling Systems.
- **Electrical & Control Systems:** Building Management Systems (BMS / JCI Metasys), Electrical Power Monitoring Systems (EPMS), Standby Emergency Diesel Generators, UPS Systems, Paralleling Switchgear.
- **Cybersecurity & Infrastructure Hardening:** Industrial Control Systems (ICS/OT) Security, Linux Administration, Log Diagnostics, Risk Mitigation.

PROFESSIONAL EXPERIENCE

Data Center Operations Engineer.
CBRE / Velociti Services (UMB Data Center) | Kansas City, MO | Oct 2022 – Present

- **Critical Environment Monitoring:** Administer industrial building automation and telemetry networks (JCI Metasys UI / EPMS) to

monitor real-time environmental baselines, dual-feed rack PDUs, and UPS systems, maintaining 24/7/365 server room uptime.
- **Operational Risk Mitigation:** Identify, isolate, and mitigate power or thermal anomalies across critical loops before infrastructure or network degradation occurs.
- **Vendor Commissioning & QA Auditing:** Act as the primary technical site escort and safety supervisor for third-party engineering vendors; actively audit vendor tasks step-by-step against engineering drawings, and perform final sign-off verification upon successful completion of facility asset upgrades, physical additions, and infrastructure modifications.
- **Physical Security & Compliance:** Enforce physical security safeguards, access control escrow, and biometric/RFID verification protocols to uphold corporate banking network compliance frameworks.

Critical Infrastructure Commissioning & Facilities Engineer
Al-Sadr Group | International | March 2011 – August 2019

- **Level 4 (L4) Functional Performance Testing:** Led the functional execution and script validation for massive industrial infrastructure cooling projects across healthcare facilities (hospitals) and large-scale commercial complexes (premium shopping malls), verifying chiller plant operations, AHU dampening, pumping dynamics, and control valves.
- **Level 5 (L5) Integrated Systems Testing (IST):** Coordinated whole-facility blackout simulations, critical emergency power failovers, and synchronized standby generator load bank testing to validate automatic electrical transition loops and concurrent maintainability matrices.
- **Sequence of Operations (SOO) Verification:** Analyzed engineering blueprints, single-line diagrams, and automation sequences to configure and test BMS/PLC control response configurations against nominal baselines.
- **High-Risk MOP/SOP Authoring:** Developed and signed off on high-risk Methods of Procedure (MOPs) and Standard Operating Procedures (SOPs) for zero-downtime mechanical component swaps, line maintenance, and electrical load isolation under strict Lockout/Tagout (LOTO) safety requirements.

- **Deficiency Log Tracking:** Managed QA/QC field logs to capture, track, and remediate structural, plumbing, and mechanical engineering defects prior to final owner handover.

Tactical Interpreter
U.S. Army (Contractor) | Kirkuk, Iraq | March 2008 – March 2011

- **High-Stakes Communication:** Provided real-time tactical translation services (English, Kurdish, and Arabic) for active U.S. Army personnel during high-stakes operational missions.
- **Critical Operational Precision:** Maintained absolute transmission accuracy under pressure to facilitate safety, alignment, and physical security parameters between senior military command and local leadership.

EDUCATION

- **Master of Science in Cybersecurity Operations** | Webster University | St. Louis, MO | Graduated: May 2025
- **Bachelor of Science in Engineering** | Technology College of Kirkuk | Kirkuk, Kurdistan | Graduated: June 2008

CERTIFICATIONS

- CompTIA Security+ **(CE)** | Candidate ID: COMP001022352266 | Active through April 2029
